MONEY MARKET.

Saturday, Oct. 5-6 P. M. Stocks took an upward start to-day and several reach ed an improvement of two and three per cent. We have not noticed a single decline. Since the adjournment of the Boards some of the fancies experienced a further advance. Long Island went up 1½ per cent; Canton, 3; Mohawk, ‡; Harlem, 1½; Norwich and Worcester, 2½; Stoniogton, ½; Farmers' Loan, 1½; Ohio 6's, ½; Illinois, ½; Pennsylvania 5's, 1; United States Bank, ½; Reading Railroad, ½; Erie Railroad, 1; Illinois State Bank, ½; Morris Canal, 1; Indiana closed firm at yesterday's prices.—
The sales were quite large, and we notice more speculative excitement in the street than has been visible for a long time. There appears to be considerable excitement among capitalists in relation to political matters, but both

parties feel so confident of success that there appears more disposition to operate than heretofore The receipts of the Reading Railroad Company are quite large, but the returns do not show much increase from week to week, but compared with corresponding weeks last year the road is much more productive at

present than heretofore.

The great increase in the quantity of coal transported this year, compared with last, is sufficient evidence of the additional productiveness of the road.

It is not surprising that the works of internal improvement in the different States should increase so rapidly in

productiveness, when we look at the returns received from all parts of the interior, shewing the movements of produce and the vast inland commerce annually carried on throughout the Union. The port of Cleveland, Ohio, on Lake Erie, has, within a few years, grown very rapidly, and has already become the second exporting city on the lakes. The receipts of wool and coal have increased very much for 1844, while most of the other items have fallen off. This is merely for the month, and the returns are confined to the receipts by the canal. The following table shows the receipts at Cleveland for the season up to

Their is a very great increase in the exports of flour, wheat and pork, being about one hundred per cent. We trust this is but the beginning of our trade with the Canadas in provisions and breadstuffs.

The receipts of tolls at Buffalo and Black Rock, from opening of navigation te the 1st inst., show the increase that must have taken place in the movements of produce from these ports.

THE following tribute from the Rev. T. CLARKE, of New Torleans, to the accommodation afforded by the North Carolina, South Carolina, Georgia and Montgomery Rail Road Route to New Orleans, we republish with pleasure;

"Having recently returned from a visit to my friends at the North, and this being the period at which those of our citizens who have had occ asion to go to the North, during the summer, are making arrangements to return, permit me, through the medium of your columns, to recommend to them to make their journey here by the Great Southern Route, as being much preferable to any other route, both in point of ease, comfort, safety, and the excellence of the arrangements to secure speed in traveling and cert-inty in arriving at the times engaged.

"I have personally travelled on this route six times, and can considently speak of its great merits and superiority over the other routes, and each succeeding year find more of our fellow etizicas who travel by it in preference to the others; and if sell confident that those who make trial of it will thank me for having brought it to their notice. Were it o enumerate all its advanced by styges, is over one of the best challed in the wind the second of a section on the route. Leaving Baltimore in the finess of the best description, and the drivers uniformly courteous and gentle-manly.

"The following is a statement of the different places and here of the proper second in the finess of the best description, and the dri

traversed by stages, is over one of the best roads at this season in the States, the stages are commodious, the horses of the best description, and the drivers uniformly courteous and gentlemanly.

"The following is a statement of the different places and periods of starting on the route. Leving Baltimore in the fine Bay boats, at 4 o' lock in the afternoon, next morning take the rail road at Wilmington, N. C., where you will arrive at 12 M, and take the boat to Charleston, arriving at 5 A. M. Thence by a rail road at 9 A. M., to Augusta, Gas, and by the Georgia rail road to Social Circle, whence you proceed by the rail road atage line to Montgoinery, Ala, from whence you take the stage at 11 P. M., to Mobile, arriving there in thirty-six hours, and then proceed here by our splendid Bay bouts, which stand in need of no recommendation from me.

"With the hope that this communication may be of use to my fellow citizens, I remain,
"New Orleans, September 6, 1844."

The agent, Mr. Gronce W. DENY, may be found at the Frankin House, in this city, to extend to passengers any in formation in relation to this very superior route to New Orleans.

WASHINGTON, Oct. 4, 1844

[Correspondence of the Herald.]

Washington, Oct. 4, 1844.

In connexion with the business of the called cabinet of Tuesday last, mentioned in my letter of the same date, I understand that an important correspondence has commenced between the Executive and Gen Almonte, the Mexican minister to the United States, on the subject of enlisting seamen, and fitting them out with munitions of war, for the two Mexican steamers lying in your port. It is thought here, by a few who have every facility of learning the cabinet movements, that the seizure of those vessels by this government is not beyond the bounds of probability. Signor Almonte will have to interpose his diplomatic powers for the prevention of every, even the most trifling, breach of neutrality by the vessels belonging to his government while in our waters, or else he will subject himself to the unpleasant alternative of seeing the laws against such violations rigidly enforced.

Amongst the pressing and prominent applicants for office from Captain Tyler, at this time in Washington, is a gentleman named Abel, the Captain's biographer. He should by all means get a foreign mission.

The Ex-Minister to Rio de Janerio, non. Geo. H. Profit, paid his respects to Captain Tyler this morning, and was, of course, received with warm manifestations of regard by his benefactor. George has pocketed about \$16000 by his excursion to South America. He goes west in a few days, for the purpose of stumping for Polk and Dallas. George is a regular fire eater, and when once he gets upon the vatump, the coons will have to streak it.

A ludicrous, but nearly fatal accident, happened lass night about 7 o'clock. One of three persons named Bowie, while riding up the Pa. Avenue, with the election returns from Bladensburg, and shouting "hurrah for Pratt," tumbled both horse and sell into a gulley in the centre of the Avenue, opposate Brown's. The men cacapid unhurt, but the horse become jammed in so close that: it required all the efforts of a number of persons te get him out with ropes.

The democratic torch light procession last night, was one of the most grand, brilliant, and effective displays, which has ever been witnessed in this or any other city in these United States. It passed through most of the principal streets of the city, and the several districts of the county, and every street, lane, and alley, in vicinity of which the procession passed, was crowded with all kinds and classes of wondering and astonished people. The number of illuminated transparencies, seemed to be beyond any human calculation; and the variety of the mottoes and political devices, with which they were graced, exceed any imaginable enumeration. For miles in length, and as far as the eye could reach, the whole af fair was imposing in the highest degree, and produced astonishing effect. Flags waved in triumph, music played the most soul sitrring sirs, thousands of houses decorated in every hue and color, with lanterns, transparencies, &c., pranced as it were in perfect exclacies; every street, lane and alley were made to resound with the shouts of ladies and gentlemen who are locofoco abbrents, and the whole scene presented an excited mass of aumanity, the like of which no pen can do justice to, or convey any idea of its reality.

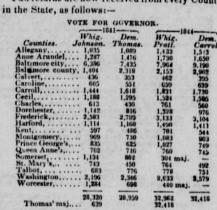

It is reality.

It mived at the rate of about four miles an hour, and was about one hour and twenty minutes pring the point at which I stood. They marched in sections of six, agreeably to previous arrangements, and composed in the whole somewhere about 9000.

The devices were numerous beyond all calculation; I noticed as prominent, many separate illuminated stars, labelled Texas, which produced no little iffect.
